EXPERIENCE

Electric Octopus

June 2025 – December 2025

AI Integration & Automation Engineer, Full Time

Remote

- Automated web & cloud apps with **n8n** workflows and API integrations.
- Integrated **Make.com**, **Zapier** and **MCP servers** for seamless data orchestration.
- Built scalable pipelines with **monitoring**, **logging** and **retry** strategies.

DigisecTechnologies

Nov 2024 – May 2025

AI Automation & Websites Developer, Full Time

Noida, UP

- Developed and deployed **AI-driven solutions**, reducing manual efforts and cutting process time by **25%**.
- Built **responsive web platforms** using the **MERN stack** and integrated **AI-powered tools**.
- Created **custom automation tools** that boosted workflow efficiency by **35%** and decreased error rates by **15%**.

Wikimedia Foundation Internship

Oct 2024 – Mar 2025

Open Source Contributor

Hybrid

- Enhanced the **MediaWiki i18n architecture** by modularizing the **en.json** file, improving translator productivity by **30%**.
- Collaborated with a global community via **Gerrit** and **Phabricator**, where I reviewed and trained students for their contributions as an official **Wiki Mentor**.
- Visited the **Meta office in Gurgaon** as part of community outreach, meeting senior mentors and expanding my professional network.

ReWorks.in

Dec 2023 – July 2024

SDE Intern

Prayagraj, UP

- Enhanced UIs with **ReactJS**, **Tailwind CSS**, **NodeJS**, and **Supabase**, boosting website responsiveness by **30%** and user satisfaction by **25%**.
- Optimized user workflows, contributing to a **15%** uplift in engagement and a **10%** drop in bounce rates.
- Improved accessibility scores by **20%** through semantic markup attributes.

PROJECTS

Wikimedia Quality Image Harvester - Jio Set-Top Box Screensaver | [Code \(GitHub\)](#)

Dec 2025

Technologies: *Python, MediaWiki API, Requests, BeautifulSoup, openpyxl, concurrent.futures, Pillow*

- Role:** Lead contributor in a multi-person project, core architect, and primary implementer who authored the majority of the codebase and led integration efforts for Jio STB evaluation.
- Built a configurable, whitelist-driven harvester with robust MediaWiki API integration to collect, filter and curate high-resolution Commons images.
- Impact: Delivered an integration-ready prototype selected for evaluation by Jio's screensaver pipeline — provided a reliable, license-compliant curation workflow intended for production STB deployment.

1. CodeResite AI Tools Platform | [Live Site](#)

Oct 2025

Technologies: *Next.js, React.js, Tailwind CSS, Node.js, PostgreSQL, Clerk API*

- Developed **CodeResite**, an AI-powered platform with **30+ tools** for students, marketers, and social creators.
- Implemented AI based solutions like **PPT generators**, **roadmap tools**, and **ATS score checkers**.
- Responsive design with **Next.js** and animations via **GSAP** and **Framer Motion** and well **SEO optimized**.
- Secured authentication with **Clerk API** and optimized database performance using **VectorDB & MongoDB**.

2. HeiSyn - AI Automations & Intelligent Agents | [Live Site](#)

May 2025

Technologies: *Next.js, React.js, Tailwind CSS, n8n, Zapier, GSAP, Framer Motion*

- Built **HeiSyn** - an AI automation agency serving **15 clients** (caller agents, social media & revenue workflows).
- Automated web and cloud services using **n8n** and **Zapier** with MCP servers to eliminate repetitive tasks.
- Designed an animated, SEO-friendly UI with **GSAP**; launched free demo tools to drive adoption.

4. Pizza Dummy Data Visualization | [GitHub Repo](#)

Nov 2023

Technologies: *IBM Cognos, Power BI, Kaggle*

- Delivered a data visualization report in IBM Cognos, slashing decision-making time by **65%**.
- Automated ETL pipelines in Kaggle notebooks, reducing manual data prep by **40%**.

EDUCATION

United University

Bachelor of Computer Application

Uttar Pradesh, India

Aug. 2022 – July 2025

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, C, PHP, Java

Git: Git Version Control, Managed Codebase with Git, Creating and Merging Branches, Resolving Conflicts

Other Languages: SQL, MongoDB, HTML/CSS, Markdown

Frameworks: ReactJS, NodeJS, ExpressJS, NextJS, TailwindCSS

Other Skills: N8N Automation, GenAI, Transformers Model, System Prompting, MCP Servers, etc, Data Analytics, Data Visualization, AI/ML, Deep Learning, UI/UX, Photo and Video Editing

Soft Skills: Leadership, Event Management, Writing, Public Speaking, Time Management

AWARDS AND ACHIEVEMENTS

- **Winner in 9 Hackathons:** Achieved top ranks in multiple categories among **5000+ participants** at district-level events. [[Tap to see](#)]
- **Selected for a fully-funded workshop at Meta (Gurgaon)** - chosen from **2,000+ applicants** [[Tap to see](#)]
- **Lead Event Coordinator - Google DevFest Prayagraj (2024/2025);** invited to community dinner with Googlers, founders and industry leaders [[Tap to see](#)]
- **Lead Organiser for a Fully Sponsored District-Level Hackathon:** Successfully secured **6 sponsors** and managed the event with over **500 participants**. [[Tap to see](#)]
- **Top 100 in Google Developers Solution Challenge:** Regional Bootcamp, Delhi. [[Tap to see](#)]
- **Winner in a Tech Startup Pitching Event,** attracting interest from **4 potential investors**. [[Tap to see](#)]
- **Founder & President of CODIFY CLUB** and also a core member of **GDG Prayagraj**. [[Tap to see](#)]

POSITIONS OF RESPONSIBILITY

Lead Tech Mentor; Founding member of WikiClub Tech - UU (Wikipedia - India)

WikiClub Tech India, Road to Wiki Cohorts, India

- Guided students in open-source contributions under the Wikimedia Foundation.
- Mentored participants on technical workflows, documentation, and collaborative development, enabling them to successfully achieve their first merged contributions in the official MediaWiki project by Wikipedia.
- Facilitated sessions to build awareness about open-source culture and contribution pathways.

President and Founder, CODIFY CLUB (Uttar Pradesh)

United University, Prayagraj (Self-built Coding Club)

- Founded and led Codify Club - a self-built student tech community focused on AI, Web, and career growth.
- Organized coding contests, workshops, and mentorship drives impacting 300+ students.
- Managed sponsorships, outreach, and partnerships with developers and organizations.

Core Team Volunteer Member, GDG Prayagraj (Google)

Google Developer Group, Prayagraj

- Help in organizing many big tech events like DevFest 2024,2025, Google IO 2025, etc.
- Supported event planning and technical sessions on Web, Firebase, and GenAI.
- Assisted in outreach and on-ground coordination for local dev community meetups.

Volunteer, TFUG Prayagraj, Wikimedia College Envoy Program, Solana India (Global Impact)

Prominent Member in these Global communities

- Contributed to open source sessions, blockchain meetups, and community learning events.
- Handled logistics, promotions, and peer engagement activities.

ADDITIONAL WORK

Community Development & Live Training

YouTube Playlist: [Live Training Sessions](#)

- Led and managed a thriving tech community of 1,500+ students, providing mentorship and organizing workshops on app/web development, AI agents, Open Source, and hackathons.
